

I am Andrei Cesmegi, the singer, guitarrist, composer and leader of the band called "SoulsilenS".

I am an entrepreneur as a musician and in the business area.

With 21 years of age, I already built the first steps of my successful life. And the more important one was to record my first album. Which one is self titled "Several Feelings".

I came from Brazil to realize a dream (some dreams).

And I needed to leave a life, family, friends, girls, jobs and the band.. back in Brazil to start building some decent steps. I did it, I came here, worked in several jobs, made money, made contacts in the music field, got a very decent English. In November 2003, I went back to Brazil, built an studio, and recorded our first CD. Because of the poverty in Brazil, the band members didn't and couldn't believe in me.

But I did it. And came back to wonderful USA in March 2004. Copyrighted it. And now we are already playing in some local stations.

Actually it has been too hard, cz I still can't bring the band to USA. But once I sell CD's and the radio played it... I can do anything... specially because we indeed are talented and we indeed have an album with 12 fantastic HITS.

There's one good thing.

It's not easy to get your songs playing on the radio. And that's amazing, cz you only get there if you really want it and really work on it.

But there's a bad thing, they are deff!!

I am sure and serious about what I am talking about.

They look at the bands images, not at the band's potential!!

Like if I had a big manager today, Paul Mckartney would be jealous!!

But as long as I am poor and don't have money to contract a million dollars agent, THEY(radio) don't care about my hits, about my lyrics, about my band's stuffs, about my potential, about my huge talent!!!

They just don't care!!!

But, as I know. You are all workers, you just move pieces of the good scene. You can not help anybody, all you can do is read, listen and say NO or then TRY LATER, or then.....

That's how I get here, I always find a way to show and prove I am the best!

Look. A very successful told me to look for communities stations to promote my music.

I didn't get any answer of them!!!

Although, I got my songs played in a couple of private radio stations...

What I mean is.. The public stations...don't work!

Do either of these serve as an example of "local programming".

It should be a big mix...

Local band need, NEEEEEEEEEDDDDD the radio's help. But the radios also need to survive, so play commercial songs, and local music, play advertisement commercials to raise some cash! Then broadcast the games on Sundays...or

whatever...

If you have some other ideas send me an email

cottonman@aol.com

One thing that is a shame nowadays is the MEDIA don't do nothing!

There are a lot of people needing real help and what a TV or a radio station could do for them anybody else can....

But all they need is to keep on the rat race... Play it and pay it...

They just care about themselves...

"Soulsilens will make a difference on the peoples life."

Look college radio stations only play your songs if you pay for an agency to promote your music...

If you don't have \$400 a month or sometimes even \$400 or more a week. You don't get airplay!!!

If you need some names..
email me.

Thank for the opportunity offered to me to writing my experiences and philosophy.

But I really don't believe it will have a result. Not because of me. I know what I am talking about. I am 21 and very intelligent, extremely talented and I always want and work to get better.

But all the organizations like these. Never works...

I found like one in my whole life that really worked for everybody... But only one.

And I have looked in a lot of countries and for a lot of years...

I am sorry for not believing in you. But it's up to you to make me believe. Because I am not that kinda person that accepts excuses or notes... I want to see action!

Sincerely
Andrei
